PROFILE

Salesforce Developer with 1+ year of experience at Ashore Systems, specializing in developing and customizing Salesforce applications. Proficient in Apex, Lightning Web Components (LWC), Flows, and REST API integrations. Skilled in automating business processes and building scalable CRM solutions.

WORK EXPERIENCE

JR. SOFTWARE DEVELOPER	AUG 2025 - PRESENT
Ashore Systems Pvt. Ltd.	
JR. SOFTWARE INTERN	DEC-2024 - AUG 2025
Ashore Systems Pvt. Ltd.	

PROJECTS

- **Real Estate CRM Application (Salesforce platform)**
Role: Salesforce Developer
Project Overview:
Developed a custom Salesforce-based Real Estate CRM to manage property listings, automate lead-to-opportunity workflows, and securely integrate external applications with role-based access control. Implemented Apex, LWC, and Salesforce automation to enhance lead tracking, data security, and end-to-end sales pipeline visibility.
- **Healthcare CRM Application (Health Cloud Demo)**
Role: Salesforce Developer
Project Overview:
Designed a Salesforce-based patient care management system inspired by Health Cloud using custom objects, flows, dashboards, and an Experience Cloud portal. Implemented patient-centric data modeling, care plan automation, role-based access, and analytics to improve care coordination and clinical visibility.
- **LWC Account Management**
Project Overview:
Developed a Salesforce Lightning Web Components-based Account Manager application to manage Accounts and Contacts with full CRUD functionality with a modern, reusable UI and Implemented Apex controllers, SOQL queries, and validation logic to ensure reliable data handling and improved user productivity within Salesforce.
